

## Town problems

My city is a great place to live, but there are several problems here. Firstly, there are a lot of homeless people in the city, and secondly, people pollute nature a lot. And thirdly, the air is heavily polluted by cars.

If I were the mayor, I would build a house where the homeless would go to eat, and there they would be in warm clothes. To reduce air pollution, I would recommend people use public transport or bicycles. Residential buildings and all buildings in the city would be heated with bio fuel. To keep the streets clean, I would fine people who throw garbage on the ground and put more trash cans.

In my opinion, this will help my city a lot. I think it would be better to give a fine for trash on the street because rubbish pollutes most of the earth, if don't do this, the earth will turn into a trash can.
