

## **Town problems**

1. My town is a great place to live, but there are a few problems too. Firstly, the air in the city is very polluted, and especially in the center of Vilnius. Secondly, there are some schools in our town, which are overcrowded by students. And thirdly, crimes in our city.

2. If I were a mayor, then I would try to reduce the amount of air pollution and would begin to produce more and more electric cars. I also would encourage people to use bicycles in the city and have only one

car for every family.

Due to the lack of places in schools, it is very difficult for children to move to another new school. Then children may not be accepted to another school or children have to sit in classes with a large number of students by the exceeding the norms. I would build a lot of new schools, so that the children do not suffer from such problem.

Unfortunately, crimes in our city are not a rare case. We have a lot of vandals in Vilnius, who spoil the walls of buildings, monuments, cemeteries and cars of other people. I believe that even for small offences it is necessary to punish these vandals and give a large fine. To decrease the number of crimes people have to inform the police when they see a crime.

3. In my opinion, this would make a big difference to life in Vilnius. But if I could only do one thing, I would try to reduce the amount of vandalism as much as possible, because damaged buildings are not pleasant for the eyes of people.
